EXPERIENCE

FREELANCE WEB DEVELOPER, DESIGNER, BRAND CONSULTANT | *December 2013 - Present*
• Build client-side web applications using front end frameworks or manipulate pre-existing code through content management systems
• Consult, design, and develop branding strategies for individuals and companies in order to meet business model expectations
• Construct style guides that defines the brand's standards in typography and color schemes, as well as ensuring consistency across different media platforms

WEB AND VISUAL DESIGNER (FREELANCE) | *Bene Scarves, February 2013 - Present*
• Develop web pages using HTML and CSS that effectively depict the overall brand
• Customize an e-commerce website through Shopify's liquid documentation
• Conceptualize and develop the visual brand and identity of Bene Scarves
• Design branding print materials such as business cards, press kits, and hangtags

FRONT-END DEVELOPER CONTRACTOR | *Perkins+Will, November 2015 - December 2016*
• Built web applications with various scripting languages and JavaScript frameworks, in order to enhance the architectural workflow
• Developed wireframes and mockups depicting user workflows for both the desktop and mobile use, while incorporating brand design aesthetics

FRONT-END DEVELOPER INTERN | *Nebo Agency, June 2014 - August 2014*
• Developed web pages from static Photoshop designs using HTML, CSS, and Sass
• Edited clients' Wordpress pages using PHP in order to fulfill customization needs
• Tested cross-browser and cross-device compatibility for possible inconsistencies
• Participated in client meetings and project planning to ensure consistency throughout the web framework

VISUAL DESIGN INTERN | *Vert Digital Agency, May 2013 - August 2013*
• Created ongoing social content graphics that contributed to the company's brand copywriting
• Developed custom graphic designs in Photoshop for social postings, websites, advertisements, and other digital marketing materials

PROJECTS

MOBILE APP DEVELOPER | *Chill Out App*
• Served as the programmer, in a group of four, to create a mobile application using jQuery Mobile, that allows the user to resolve anxiety at the push of a button
• Created case studies and defined the project's scope through iterations of user research
